@larga

Larga is a website that highlights the beauty of the Philippines by showcasing a variety of travel destinations. Whether you're looking for stunning beaches, scenic mountains, or vibrant cities, Larga provides simple and useful information about each location. It offers insights into what makes each place special and how you can easily get in touch with the team for any questions or help. The goal is to make your travel planning easier, fun, and full of exciting possibilities without any confusion or complicated details.

The friendly team is always ready to assist with any inquiries, ensuring a smooth and enjoyable experience from start to finish. With Larga, you can discover the wonders of the Philippines and plan your dream vacation with ease.

- Website Structure -

1. **Files**

- actionpage.html

This file contains the HTML structure for the action page, which thanks the user and provides a link back to the home page.

- home.html

This file contains the HTML structure for the home page, which includes sections for home, about, destinations, and contact.

- css/style.css

This file contains the CSS styles for the website, including animations, layout, and design.

- images

This file is an image used as a background in the home page.

2. **Usage**

 # *Viewing the Home Page*

   - Open `home.html` in a web browser to view the main page of the website.

   - Navigate through different sections using the links provided in the navigation bar.

 # *Contacting the Team*

   - Scroll down to the "Contact Us" section on the home page.

   - Fill in your email and message in the provided form fields.

   - Click the "Send" button to submit the form. You will be redirected to `actionpage.html`, which thanks you for your message and provides a link back to the home page.

Navigating Back to Home

   - On the `actionpage.html`, click the "Home" button to return to the home page.

 # *Using Social Media Links*

   - At the bottom of the home page, there are social media icons for Facebook, Instagram, Twitter, and LinkedIn.

- Click on any of these icons to open the respective social media page in a new tab.

3. CSS Styles

The CSS styles are defined in `css/style.css`

 Key styles include:

Animations - Defined using `@keyframes` for sliding effects.

Fonts - Imported from Google Fonts (`Unlock` font).

Layout - Flexbox and grid layouts for responsive design.

Buttons - Styled with hover effects and transitions.

4. JavaScript

The JavaScript code is embedded within the HTML files to handle navigation menu toggling and form submission redirection.

Example:

```javascript
<script>
    const b_menu = document.getElementById('menu');
    const b_open = document.getElementById('open');
    const b_navigate = document.getElementById('navigate');
    b_menu.addEventListener('click', () => {
        navigate.classList.add('active');
    });
    b_open.addEventListener('click', () => {
        navigate.classList.remove('active');
    });
</script>
```
